Group Activities; Hands on Science; Object Permanence;
*Observational Learning; Science Instruction; Science Process
Skills; Student Motivation

ABSTRACT

In this activity, students experiment and observe the similarities and differences between human-made objects and nature in small groups. Students compare the function and structure of hollow bones with drinking straws, bird beaks and tool pliers, and bat wings and airplane wings. A classroom discussion can be held to discuss similarities and differences that are observed along with follow-up assessment activities such as journal writing and Venn diagrams. This activity requires a 60- minute time period for completion. (Author/SOE)

Activity: **Compare Human-Made Objects with Natural Objects****GRADE LEVELS:** 3-5**SUMMARY:**

In small groups, students will experiment and observe the similarities and differences between human-made objects and nature. The students will compare the function and structure of hollow bones with drinking straws, bird beaks and tool pliers, and bat wings and airplane wings. A classroom discussion can be held to discuss similarities and differences that were observed along with follow up assessment activities such as journal writing and Venn diagrams

LEVEL OF DIFFICULTY [1 = Least Difficult: 5 = Most Difficult]

1-least difficult

TIME REQUIRED

60 min

COST

\$0

received from the person or organization
originating it.

☐ Minor changes have been made to
improve reproduction quality.

• Points of view or opinions stated in this
document do not necessarily represent
official OERI position or policy.

STANDARDS:

PK-2 T/E

1.1 Identify and describe characteristics of natural (e.g. wood, rocks, wool) and human -made materials (e.g. Styrofoam, plastic, fabric).

1.2 Identify and explain some possible uses and advantages for natural and human-made materials.

3-5 T/E

2.4 Compare natural systems with mechanical systems that are designed to serve similar purposes, e.g., bird's wings as compared to an airplane's wings.

SEA 0013

WHAT WILL THE STUDENTS LEARN?

Students will observe that many human-made objects get their basic design from things in nature. They will also discuss the importance of function in design.

BACKGROUND INFORMATION:

See the book "Nature Got There First" by Phil Gates

Vocabulary:

Evolution: the natural or artificially induced process by which new and different organisms develop as a result of changes in genetic material

Adaptation: the process or state of changing to fit new circumstances or conditions

Survival: continuation in life or existence

RESOURCES:

<http://www.velcro.com/kidzone.html> - Story of Velcro

Gates, Phil. Nature Got There First. New York, NY: Kingfisher Books. 1995.
pg. 7-49 - Great examples

http://wings.avkids.com/Curriculums/Birds/wing-shapes_summary.html -Activity
comparing birds wings and airplane wings

MATERIALS:

Models of bones

Drinking straws

Tubes

Pictures/models of bird beaks

Tool pliers

Pictures/models of airplane wings

Pictures/model of bat wings

Paper

Bee's nest

Velcro

Burrs

Other objects found in "Nature Got There First"

PREPARATION:

Gathering Materials and photocopying comparison chart

DIRECTIONS:

1. Read and Discuss Nature Got There First. Pg 7-50
2. Allow the children to explore the materials, and compare their similarities and differences.
3. Have students fill out the compare and contrast chart, in groups if desired. They are encouraged to fill it with the objects provided, and with others they know about. For younger grades, you may wish to have them draw and label the objects as well as comparing them.
4. for an extension (homework perhaps) have students find three other human-made objects that are designed after something in nature.

INVESTIGATING QUESTIONS:

How are things found in nature similar to human-made objects?

Why are objects in nature designed the way they are?

Why do many human-made objects resemble those found in nature?

Why do things in nature look the way they do (e.g. birds' beaks, bee's hive, armadillo)

REFERENCES:

None

SAMPLE RUBRIC:

Journal writing

Compare and Contrast Charts

Brainstorm other objects

Student observations:

All students should be able to identify common objects.

Advanced student should be able to describe the objects and other objects that they have discovered on their own.

Activity Evaluation Form

www.k12engineering.org

Activity Name: _____

Grade Level the Activity was implemented at: _____

Was this Activity effective at this grade level (if so, why, and if not, why not)?

What were the Activity's strong points?

What were its weak points?

Was the suggested Time Required sufficient (if not, which aspects of the Activity took shorter or longer than expected)?

Was the supposed Cost accurate (if not, what were some factors that contributed to either lower or higher costs)?

Do you think that the Activity sufficiently represented the listed MA Framework Standards (if not, do you have suggestions that might improve the Activity's relevance)?

Was the suggested Preparation sufficient in raising the students' initial familiarity with the Activity's topic (if not, do you have suggestions of steps that might be added here)?

If there were any attached Rubrics or Worksheets, were they effective (if not, do you have suggestions for their improvement)?

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign in the indicated space following.

- ☒ Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g. electronic) and paper copy.
- ☐ Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.
- ☐ Check here for Level 2B release, permitting reproduction and dissemination in ERIC archival collection microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche, or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
